

Your customers – especially the up and coming newest generation of highly Web-savvy users – expect the very best customer support experience from you. Efficient, timely communication with your customers can't be compromised.

Today's top names in software and technology are turning to Parature for top-of-the-line service and support for their customers. Parature is the only company to provide a complete product that's rapidly deployed and easy to use. Parature Customer Service™ software integrates the customer portal, knowledgebase, ticketing, and a host of other modules in one dynamic, tightly unified system that manages all your support needs.

Parature provides the only true, on-demand 100% customer service software available. As a SaaS (software-as-a-service) provider, we deliver our product suite over the Internet using a secure, scalable application and system architecture that requires no software downloads or IT help. Best of all, a Parature implementation is measured in days, not weeks or months.

There's no smarter, more efficient way to serve, support, retain, engage with and maximize the value of every customer.

A few months ago, I thought I had to hire more CSRs, but now they are asking for more work because Parature Customer Service™ software has **reduced so much of the workload.**

VP of Sales and Support, Moniker Online Services, LLC

PROVIDE A COMPLETE SELF-SERVICE SUPPORT CENTER

With Parature, from day one your portal provides a complete, professional 24/7 support presence that matches your unique needs.

From here, your customers have immediate access to a robust knowledgebase where they can help themselves to a variety of information – troubleshooting tips, updates, best practices, frequently-asked questions, glossaries, and the latest product documentation, manuals or downloads.

Your customers can easily submit even the most complex problems and track the step by step progress of their trouble tickets right from the Web, without ever having to contact your support team. A complete ticket history is always available for your customers to store, reopen, or post comments to resolved tickets.

BENEFITS AND FEATURES

- ✓ Be more proactive and strategic about driving customer satisfaction
- ✓ Reduce issue resolution times and repetitive inquiries
- ✓ Drive down call/email volume while improving overall level of service
- ✓ Speed the process of tracking and fixing software and other technical issues
- ✓ Raise the productivity of customer service representatives and reduce agent load
- ✓ Encourage feedback and interaction
- ✓ Reduce overall costs
- ✓ Maintain a better handle on overall customer satisfaction – stay on top of trends
- ✓ SaaS delivery for 24/7 access – no need for additional hardware, software or IT support
- ✓ World-class hosting facility enables 99.5% uptime for every Parature customer. All data is safeguarded by state-of-the-art security technology

REDUCE EMAILS AND REPETITIVE QUESTIONS

High email volume from your customers takes time away from providing more high value services. We'll help you centralize and manage all email communications, so you can respond quickly and efficiently. And as you build your robust knowledgebase that lets customers find answers themselves, your support team is freed up to handle more of the "one off" questions and issues that demand live assistance.

REPORTS PROVIDE VISIBILITY INTO ISSUES AND TRENDS

With Parature, you can get both high level and detailed views into all your support activities.

Business Objects reporting offers extra tracking, analysis and reporting power to track everything from response times to staff requirements. You can also analyze important customer trends around support. For instance, get a handle on the top ten technical support issues, so you can be more proactive.

Parature lets you determine the most effective ways to strengthen and grow your retention efforts. For instance, you can set up different tiers of support based on your own business rules. The flexibility is yours.

GET ONGOING CUSTOMER FEEDBACK

Staying in tune with what your customers want is critical. Parature helps you keep tabs on user satisfaction with complete survey capabilities that provide a steady stream of valuable feedback – important to developing new features and product functionality, cross selling and upselling future products, and expanding your customer base.

BETTER MANAGE YOUR SUPPORT WORKLOAD

With Parature, you can be smart about how you use your internal support resources. Monitor individual customer service rep performance and productivity, keep track of peak user times and better manage the entire workload.

ABOUT PARATURE

Parature enables organizations to better serve, support, engage with and retain their customers via the Web. Industry-leading, on-demand Parature Customer Service™ software provides customer service organizations with a comprehensive, multi-channel way to meet the growing expectations of their customers.
